

Foundational Principles for Political Interaction

(A Response with respect to The Christian Nationalism debate)

- 1. All elements, or features, associated with the **Adamic, Noahic, and Abrahamic** covenants are in operation today. These were always held and enforced (since their inception discussed in Genesis) **before** the law of Moses, **during** the law, and **since** the law.*
- 2. The **national** program of Israel and the **international** program of the Church are anchored in the Abrahamic covenant. Israel was to represent a nation that was in contradistinction with respect to the city-state program from Cain to Nimrod. The Church is the **Commonwealth of Israel**, and serves as the international ambassador core for the Oracles of God.*
- 3. Any individual, or nation, which opposes both the **laws of nature and/or nature's God** will ultimately be judged, punished, destroyed and/or replaced by other entities more in compliance with the Will of the Creator.*

Today, we have become so deficient in Biblical understanding we are more engaged with subduing **each other**, since the Fall, rather than in subduing the earth. Our efforts in characterizing our political understanding in terms of *right and left* is a reductionist exercise that is metaphysically deficient. We need to return to the transcendent source of true knowledge.....**The Word of God**, which we refer to as the Bible. This knowledge was even seminal for cultural development during the so-called Axial Age (before Christ) as well as the Renaissance and Reformation which broke forth following the so-called Dark Ages. America **must** return to this understanding, or **die** as a nation.
